Vaasthu sasthan techniques

TSR Ramakrishnan

Abstract

Nowadays many problems crop up Because of vasthu deficiency. Hence what are the guidelines we have to follow while purchasing a site for house or office construction is a must everyone to know. That has been illustrated in the article. In the same way how the lay out of room should be made in the house like provision of reception hall, bedroom, puja room, kitchen bath room, stair case and how best the tree seedlings can be planted, doors and windows fixation details explained. Vaasthu puja on which dates should be constructed so that we can avoid financial or labour problems while construction

Keywords: Importance of vasthu and various factors needed while going for a purchase of land or construction of house or shop or flats

Introduction

VISWAKARMA is the chief architect of indhralogam and from him the vasthu Sasthan came. Before buying any land or site we have to analyse whether that area fulfils the vasthu rules. Though there are no specific Pooja before buying a land we have to consider the following points. We have to select suitable land or site. Residential houses should be near to that place. Good ventilation, aeration, natural vegetation and clean environment should be there. Cremation yards, hillocks, mountains, nearness to sea should be avoided.

Eastern side (Indira moolai) should be in down western side Niruthi/Varuna Moolai should be at aslightly higher elevation to east. This area is termed as Goveethi and it will give wealth and health. Future development will be good.

Eastern side higher and western side down side is called as Jalaveethi, which is not good for residences. Northern side lower downside and south at a higher elevation is called GAJA Veethi. This place is also suitable to construct houses. Esaniyam north east side heighter and south west less height is termed as Bootha Veethi and this is also not suitable. South east (Agni moolai) heighter and North West (Vayu moolai) down side is termed as Naaga Veethi and this Is also not advised. niruthi moolai heighter and esaniyam down is called Dhaanya Veethi and it is recommended for houses. More health and wealth Assured. Unexpectedly if you have selected an unfit land, then do all.

Homams and pariharams and then start the work. Likewise after buying a site, start the Fencing or compounding work in south west direction first. It enables Strength to south west corner and there will not be any financial constraints while taking up the construction. After completing the house construction north and east side compounds should be constructed. South and West side compound Walls should be heighter than north and east walls. Esaniyam side is the Junction of north and east side. Here only Lord Guru is there. So The Room This side should be neat and clean ever. Pujai room can be fixed there. There should not be more weight in esaniyam. Sufficient Windows and Doors should be provided to get good sunlight and aeration the house owner gets all iswaryangal. Kitchen should not be fixed in easaniyam. Esaniyam flooring Also should be down to the other side floorings. East and north facing houses can allot portico or sit outs in this esaniyam side. Reading rooms, bore wells, Office room, puja room, rain water storing pit can also be fixed in esaniyam. But overhead tanks should be fixed in south west corner of the upstairs. It enables wealth cash-flow and no financial constraint. Overhead tank should be fixed at least four feet height to the roof parapet wall. Putting overhead tank in esaniyum will hinder the progress of the house owner. Besides debt loans interest higher may comes to the owner.

Which month and time to go for construction

If we start construction in chithirai (April 14-May 14) it is good. if we start the Construction in vaikasi month (may 15-june14) income and dhana labam will be more.

ANI month (June 15 –july14) not advised. Adi month (July 15-aug14) good effects get disturbed. Avani month (Aug 15-sep14) there will be dearth of Labourers scarcity. Purattasi (Sep 15-Oct 14) month may result in health relate problems and diseases. Iyppasi month (Oct 15-Nov 14) very auspicious month Karthigai (Nov 15-dec 14) more wealth and profit comes to owner.

Margazhi month (Dec 15-jan14) not adviceble. Thai month (Jan 15-feb 14) we can achieve all our desires. Masi month (Feb 15-march14) the house owner Get all wealth and astaiswaryangal. pankumi also not desirable for new house Construction.

Vaasthu Pujai when to do?

Vasthu purushar is the authority for starting building construction. Vaasthu Used to wake up only in eight days in an year. That is a fixed date of Tamil Month. He will be awake for 90 minutes (3 ¼ nalogai) each nalogai runs for 24 Minutes. He will perform suthi, bathing, pujai, bojanam and thamboolam for Every 18 minutes. Last 36 minutes bojanam and thamboolam is suitable time for doing vaasthu and palakkal pujai. Don't bother astami, navami, Saturday or marana yogams or raghu kalam or yamagandam or morning or evening.

He wake up in the following dates at proportionate nalogai after suryodayam.

Chithirai 10th --- after 5 nalogai-Pujai timing-8.54am-9.30am
 Vaikasi 21st... after 8 nalogai-Pujai timing--10.06am-10.42am
 Adi 11..... after 2 nalogai- Pujai timing---7.42am-8.18am
 Avani 6th..... after 21 nalogai-Pujai timing---3.18pm-3.54
 Iyepasi 11 th. After 2 nalogai--Pujai timing--7.42am-8.18 am
 Karthigai 8th after 10 nalogai--Pujai timing--10.54am-11-30 am

Thai 12th after 8 nalogai--Pujai timing-- 10.06am-10-42am
 Maasi 22nd after 8 nalogai--Pujai timing---10.06am---10.42am

If we do the palakkal and vasthu Pujai on these above days and timings, the Construction work will be in full swing without any hurdles and financial crunch.

Planting tree seedlings where?

North direction considered as subitcham and wealth and positive Vibrations are coming from that side. So tall trees should not be planted in that Direction. South is the side of yaman and west is the side of varunan.

So heavy structures, taller walls can be constructed to protect us. However south west corner should be the tallest and overhead tank can be constructed There. Morning sunlight is good and contains viamin d etc. so eastern side more doors and windows should be provided. Western side minimum doors and windows can be provided to prevent ultraviolet rays of sun.

Bedrooms

Bedrooms of the senior most person of the house should be in the south west side rooms and youngsters in the North West side. If bed rooms are in the agni moolai, unwanted quarrel and misunderstanding between couples arise.

We should not keep our head on north direction as magnetic forces disturb our Mental activities. Likewise we should not face yama disai ie south. Keeping head on south and east or west advised. Toilet and bath rooms should Not be provided

in easaniyam and south west corner as it will make us restless, Loss of wealth, misconduct within family members. We should not sit In the toilet facing east or west. Hence toilet basins should be fixed only in the north south directions. Septic tanks should not be constructed in esaniyum or niruthi moolai areas. Electricity main connection should be installed in Agni moolai or vayu moolai. Maximum windows and doors in ground floor only. In the upstairs windows numbers can be reduced.

Main entrance should be bigger one. Gajalakshmi photo or in wooden carved May be provided in the entrance doors. There should not be any toilet or Pujai room below the stair case. The stair case steps and main door entry step should be in odd numbers. Opposite to main entrance there should not be Electricity post or council dust bin or opposite house's entranc door.

Safety lockers or main almirah should be placed in the south west corner of each room. It should open either east or north side only.

THE building should be rectangle or square to the extent possible. You should not leave any offsets in south, south west, esaniyum and vayu moolais.

Its bad effects can be seen after many years. Damaged or cracked mirrors should not be kept. Wash basins taps heaters Etc should be fixed on the northern side walls preferably. While cleaning the flooring tiles with antifungal, antibacterial mixed water, please add little common salt and clean it. Underground rooms should not be empty or unwanted materials alone should not be dumped there.

Pujai room should be there in each house or one cupboard may be kept and Lord Vinayagar and other deities photos can be kept and Pujai should be done regularly. Morning and Evening Hours lamp should be lighted at least for 1-1 ½ hours. Main entrance door shadow should not fall in front of it. Esaniyum should be kept always clean without dust and waste materials. Because it is considered face of the house. Red earth, cashew, pavalam should be tied in a white or yellow small cloth and hung on the west side wall and worship with camphor lamping every Tuesday will give peace and calmness to family members and also save from envity and travel hazards. Vasthu purushan uruvam, nagam structure made in silver, copper wire, pearl, pavalam, little red earth should also be tied and kept in the eastern wall or puja room will give wealth and health to the family members. Everyday main entrance door step should be cleaned and viboothi sandal and kumkumam should be placed on both corners and Worshipped as Mahalakshmi is considered to be living there. We should not keep our legs in the main door entrance or step. Likewise we should not sit there. Children should not sleep or read below the roof beams or chat.

Every Monday and amavasai days rudhra Jabam should be chanted for all Happiness in family. Reading in north east, North West rooms will give good concentration. Creativity will grow there. Reading table or chair should face east or north directions. North side will give clear thinking and east will tuneup our brain and involvement. TO avoid thoshams in lockers or almirahs where we keep our jewels or cash we can paste one mahalakshmi deity sticker and yellow mini towel in memory of Lord vinayakar. Keeping swarna alanakara Venkatachalapathi picture in front of the main entrance will solve all thoshams.
