Abstract

Vedic Astrology is an ancient Indian science which explains planetary motions and positions with respect to time and their effect on humans and other entities on earth. With the individual birth charts one can predict various stages of events in humans like Education, Jobs, Health, Marriage, Children, and Prosperity etc. According to the Indian Society of Assisted Reproduction, infertility currently affects about 10 to 14 per cent of the Indian population, with higher rates in urban areas where one out of six couples is impacted. Nearly 27.5 million couples actively trying to conceive suffer from infertility in India. Now a days many childless couples are resorting to Artificial insemination methods. The success rate of children is only 10-30% depends upon the type of methods used. In this paper, it is discussed how Vedic Astrology is useful for predicting time for going to Artificial insemination methods and increase the success rate of having children.

Keywords: Vedic Astrology, Infertility, Artificial Insemination, Progeny, Dasha

Introduction

Jyotisha Shastra has been widely discussed in Vedas. In *Rigveda* through 30 shlokas, In *Yajurveda* through 44 shlokas and in *Adharvana Veda* through 162 shlokas, the astrology is deeply discussed. In ancient *Puranas* the Jyotisha Shastra referenced many places. Vedic astrology has many branches. *Siddanta* astrology deals with Astronomy and its applications. *Samhita* covers Mundane astrology, predicting important events related to countries such as war, earth quakes, political events, astro - meteorology, financial positions, electional astrology; house & construction related matters (Vaastu Shaastra), animals, portents & omens etc. *Hora* (Predictive astrology) covers important events in human life like Jod, Marriage, Children, Health and prosperity etc. Due to change of Indian Culture over the years, our traditions and hence life styles are changing. Now a days both husband and wife are leading busy lives, in that process enough time is not given to family life, causing derived problems like not having children, not able to bring up the children properly, Health issues etc. In India, it is observed that around 4.5 lakh couples are suffering for want of children and going for infertility Hospitals for artificial fertility.

According to the Indian Society of Assisted Reproduction, infertility currently affects about 10 to 14 percent of the Indian population, with higher rates in urban areas where one out of six couples is impacted. Nearly 27.5 million couples actively trying to conceive suffer from infertility in India.

Udyoga parva states

Infertility is the big worrying factor to the government and not only to the individual couples. It will affect the social and interpersonal relationship. The outcome of infertility will have its effect on different aspects of the life of the individual and nation. In India, women suffer from the brunt of the social, psychological and physical consequences of childlessness. Childlessness destabilized marital bonds with gendered consequences. For women, motherhood is not only a foundation of status and power; it is the only opportunity for women to ensure their marital security. Women experience abuse, exclusion, rejection and stigmatization at the couple, household and societal level, while men experienced minor taunting, teasing from friends.

Materials and Methods adopted for the Study

Generally, to investigate infertility, the birth chart of the native is studied for the promise of children. 5th house and Jupiter as karaka are responsible for children. If there is a promise of children in birth chart then only proceed to further and determine the reason for delay of children. If there is no promise of children in birth chart, the adoption of children is suggested. The reasons for delay may be due earlier janma shapas (purva janma karmas), Self-induced delay (using contraceptives), Medical abnormalities etc. The childless couples who require artificial insemination methods are determined based on Vedic Astrology. By studying the Dasha and Antardasha, the proper time for going to Artificial Insemination methods is predicted with the help of astrology and advise the native to implement the same at that particular time and observe the results are observed.

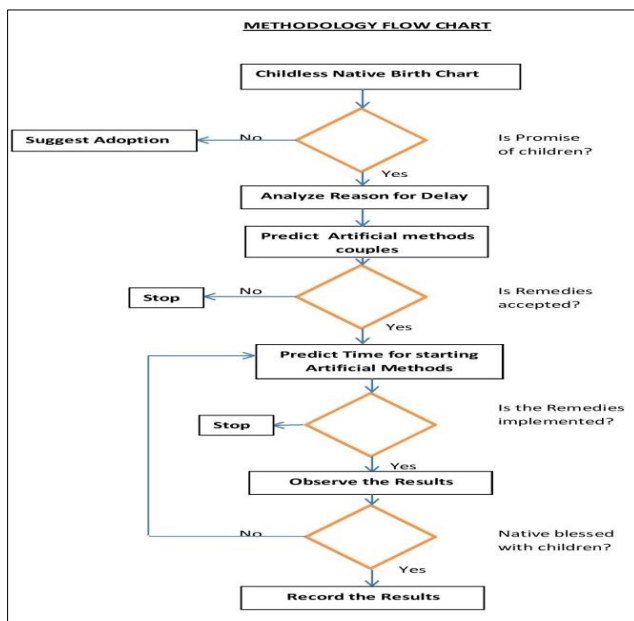

Fig 1: Methodology Flow Chart

Basic Promise of Children through birth chart

These should be seen from lagna, Moon and karaka Jupiter

- The Jupiter or Venus in lagna gives many children.
- The lagna lord conjoined with or aspected by benefics many children.
- The lagna lord and 5th lord in own signs or exchange sign indicate good promise.
- 2nd lord in lagna/ 5th house or their exchange gives children
- Beej or Kshetra Sphuta and their lords must be strong.
- Lagnesh and 5th lord should be related and well placed in good houses in birth and Saptamsha chart.
- Jupiter, Moon, Venus and Mercury are in any good house jointly or severally without malefic influence.
- Jupiter is strong and 5th lord aspected by Lagnesh.
- Strong Jupiter aspects 5th house and Moon, Mars and Venus are in their own Navamsha.
- 5th lord is related with strong 2nd, 9th or 11th lord in a good house and aspected by a benefic.
- Putra Saham (sum of longitudes of Jupiter-Moon+ lagna) strong & well aspected and Jupiter's transit over it/ its trines.
- 5th lord and Jupiter and their depositors are strong and it benefic Vargas.

- enus/ Moon in own sign is related with 5th house/ lord or Jupiter.
- Lagnesh or 5th lord is in 1, 2, 3, 9 or 11th house.
- If 5th house/ lord weak, but 9th and 10th house/ lord are strong.
- Sun or Moon with Rahu in lagna/ Arudh lagna aspected by benefics.
- If the Navamsha lord of the 5th lord or of mid-point of 5th house, is conjoined with or aspected a benefic like Jupiter/ Venus, one may acquire children.
- If the Navamsha lord of Jupiter is in a Kendra and is conjoined with or aspected by benefic/ (s), there will be acquisition of children.
- If the 5th lord and the Lagnesh or their Navamsha lords exchange places, there will be acquisition of children.
- If the Navamsha Lord of 5th house joins 5th house with a benefic, acquisition of children is indicated.
- If the Bhava Madhya (Mid-point) of 5th house falls in a Navamsha of Venus, one may have many children (more daughters), as Venus indicates fecundity and is one of the qualification of begetting many children.
- Benefics alone in 4th house or Jupiter exalted in 6th house or 5th & 7th lords in 11th house or all the malefics in 12th house or a malefic as 5th lord in 5th house are good for progeny.
- The Jainini's Putra-karaka (the planet with fifth highest longitude in the sign) should be strong and well placed.
- In a female chart, Mars, Saturn and Rahu are in Kendra/ Trikona; or Mercury, Jupiter and Venus together in any house; or lagna and 9th lords in 7th, 7th lord in 11th and 11th lord in 5th indicate many children.
- As per Saptrishi Nadi, a strong 5th and 10th house and their lords are better indicator of the promise. Again 3rd being house of valour and stamina and 5th being 3rd of 3rd house, without strong 3rd house/ lord, it is difficult to have a child.
- The Saptamsha has the most crucial role in indicating promise of children through its lagna, 5th house and their lords.

Artificial Insemination Methods

Artificial insemination (AI) introduces sperm into a woman's uterus, allowing her to get pregnant without sexual intercourse. It can be conducted with donor sperm or the intended father's sperm. Women may undergo artificial insemination if they're struggling with infertility, or the inability to conceive despite having regular unprotected sex. AI can combat male factor infertility from inadequate sperm count, motility, or manoeuvrability. Women may undergo artificial insemination if they're struggling with infertility, or the inability to conceive despite having regular unprotected sex. AI can combat male factor infertility from inadequate sperm count, motility, or manoeuvrability. It's also a solution for female infertility from thick cervical mucus, endometriosis, or abnormal reproductive organs. There are two methods through which Artificial Infertility methods performed. 1. Intrauterine Insemination (IUI) and 2. Intracervical Insemination (ICI). In both the methods, the timings of insertion of semen is very important. Here, Vedic astrology is of immense help for predicting time.

Astrological combinations for Artificial Insemination

- In mother's birth chart, there should be positive basic promise of child birth.

- In mother’s chart, Moon and Mars controlling menstrual cycle should be afflicted by Saturn/Rahu, Indicative of obstruction in her reproductive organs.
- Jupiter, the natural karaka of progeny, is weak/ill placed to indicate that birth has been manipulated by extraneous forces rather than through Divine grace.
- The 5th lord from lagna and Moon are afflicted.

Let us examine a birth and Navamsa charts (Fig. 2 & Fig. 3) for seeing the Artificial Insemination prospects.

The native is having Scorpio lagna. The lagna lord Mars is with Ketu in 11th house. The 5th lord Jupiter is in 5th house with retrograde in Gandamoola Nakshatra. 9th lord is in 5th house with Rahu, and both are in same nakshatra of Saturn and are in mutual aspect with 6th lord Mars associate with Ketu. Influence of Mars and Rahu on 5th house indicate children not with Divine grace but artificial conceiving. In Navamsa, the native is having Aquarius lagna. The Jupiter is in Pieces with Rahu, Ketu axis, afflicting 5th lord Mercury and Moon, while depilated Mars afflicting Sun-Saturn combine. This again indicates not natural conceiving.

Predicting the time for having children based on Vedic Astrology:

If progeny is promised, the time of pregnancy is indicated by-

- Pregnancy may be expected during dasha/ Antardasha of powerful among lagnesh, 5th lord, 7th lord, 9th lord, Jupiter, Moon, Rahu, thei depositor or Navamsha lord, planets in 5th house or aspecting 5th house/ lord.
- Saturn and Jupiter’s connection with lagna and Lagnesh, 5th house/ lord or 9th house/ lord through PAC from lagna and Moon.
- The distance of 5th lord to Lagnesh or 5th house denotes time interval to get pregnant.
- Close relation among any two of the following-5th lord from ascendant, Moon, Jupiter, Jaimini Putra Karaka and from Karakarnsha lagna.
- Presence of unafflicted Mercury in 5th house indicates early and repetitive pregnancy.
- Strong Jupiter/ Venus in 1st, 5th, 7th or 9th house.
- Any of the above in Navamsha and/ or Saptamsha.
- During transit, Saturn and Jupiter separately influence 5th house/ lord.
- In transit, Lagnesh, Jupiter, 5th lord and 9th lord conjoin or aspect each other.
- In transit, Jupiter enters the sign or Navamsha of 5th lord from Lagna, Moon or Jupiter.
- In transit Jupiter influence *Santaan Saham, 5th pada* or *Putra Karaka*.
- In transit, Mars and Venus together aspect 1, 5, 9 or 10th house/ lord.

Let us examine another Birth chart for predicting time of pregnancy.

Fig 5: Navamsa Chart

The native has Libra lagna. Lagna lord Venus is strong in 9th house. Rahu in 5th house, 5th lord Saturn retrograde in 3rd house and associate with Moon. 9th lord Mercury is in 11th house associate with Sun, Ketu and aspecting 5th house indicating difficulty in getting children. In birth chart, 22 Drikkana lord is Saturn. The putra karaka Jupiter in trick house (8th) indicating difficulty for children.

In Birth chart Mars and Moon afflicted by Saturn and Rahu. The Jupiter is in trick house (8th) and weak. 5th lord Saturn and Moon are afflicting. All these are indicating having children not by Divine grace but with Artificial methods. Further, in Navamsa, Karaka Jupiter is in trick house (12th). In Saptamsa, Karaka Jupiter is debilitated.

The Dasha for the native is studied. The native is advised for Artificial Insemination methods during Rahu maha dasha with Jupiter Antar dasha period (15-1-2020 to 9-6-2022) in which time the Jupiter and Rahu is favourable.

Test Results and Analysis

Around 15 birth charts, who are suffering for not having children have been collected for study. The birth charts are filtered and considered for further study, only the persons who are having promise of children in their horoscope and presently not having children. This is further filtered and taken as per Vedic Astrology, only natives who will have children through Artificial Insemination methods. The native’s Dasha and Antardasha is analysed and predicted the time for having the children. The implementation observed. After implementation, the results are as follows
 Total Birth Charts of Child less natives considered: 15
 Birth Charts having Promise of Children: 10
 Suggested for Artificial Insemination methods: 3
 Timing predicted based on their Dasha system: 3
 Number of people had pregnancy: 2

Table 1: Results Analysis

S. No.	Details	No. of Persons
1	No of people had promise of children	10
2	No. of people suggested for Artificial Methods Yatra/Temple Visit	3
3	No. of people had prediction of Time Homa	3
4	No. of people had children Artificial fertility	2

Fig 6: No of persons

Conclusion and Future Scope of study

In this paper it is explained how Vedic Astrology is useful for finding people who will get children through Artificial Insemination methods, If there is a promise of children in the native's birth chart and still not having children. The timing (Muhurtha) of having the children based on native's Dasha, Antardasha is predicted for going artificial fertility. The test results are encouraging and showed that Vedic Astrology is useful for having children. For the future study, it is suggested to take a large number of infertility couples' samples and predict and suggest the timing for having children and consolidate the results.
