Abstract

Vedic Astrology is a science which is based on basic assumption that planets do influence us that law of karma and theory of cause and effect is genuine and there is continuity of life even after physical death.

Through this paper we are trying to understand how to prescribe a gemstone as per the Persons Vedic chart. The gemstones are recommended on pure basis of planetary positions, strengths, weakness and its aspects on various houses for that an astrologer has to be aware of certain points before, he suggests anything. There are many aspects considered before recommending like one cannot prescribe on basis of only the moon sign of the person. Similarly, one cannot recommend the stone of 6th, 8th, 12th lords.

With this regards we have analysis N number of Kundli's till now. Over 50 charts analysis done till now just to recommend better stone/gems. Which included planets, nakshtra, mahadasha, degree, exaltation (UCH) debilitation (NICH). Also we will guide suitable day with right rituals and which finger, how many carats pf stone to wear stone, gems as well. We will guide accordingly to client kundli which stone and gems will be suitable for client and how gems will give the best result.

We consider many elements before we recommend. We need to be careful about many angles like what is the sign lord, 5th and 9th lord, Mahadasha, Navmansh, planetary positions and their degrees.

We also see the stone which is given its lord and which nakshatra it lies and which house does it aspect. Its good and bad elements whether is retrograde or combust. This way considering quite some factors before recommending a Gemstone after been fully aware of the results. In certain cases, the stones are prescribed taken in consideration if the enemy planet is stronger of the planet who's Mahadasha is on we can take note of the 5th, 9th or 1st (Lagna) lords' position and if the lagna lords position is good and not Aspecting 6th, 8th or 12th house and not debilitated we can consider further. Apart from these conditions, we need to understand the persons need, questions and whats the requirement. Right analysis of the chart and the persons problem area is extremely important. Above that, the gemstone should be 100% natural. It should be as per the height and weight of the person's and analysis chart. The weight of the stone etc has to be taken care. The astrologer has to also do the cleansing and energizing of the stone as per the dedicated rituals. The astrologer needs to provide the right information about the metal it has to be made in. Along with, many such vital information like which day it has to be worn, with which stone it will get along and which ones to avoid. What is to be eaten and avoided such many conditions are absolutely important and has to be informed well before designating a stone to someone. Hence, an astrologer has an extremely important role to play in Analysis, rectification, right advice, right stone recommendation with any more small but vital information to the client.

Many remedies have been given in Vedic astrology, one of which is the way to wear a gemstone. Wearing a gemstone is beneficial when the gemstone is pure and natural and is given according to the horoscope. Vedic Mantra increases the power of gems which is capable of giving benefits according to the horoscope of the native. Gemstone is a precious stone found in nature's mines, which helps people to solve the problem given by the planet. Correct knowledge of the decoration of the gem and the method of wearing it is very important. The gemstone should not be worn by one's own choice, nor only according to the moon sign or name, but it is very important to analyze the horoscope correctly for the gemstone so that the wearer of the gemstone does not suffer any kind of harm.

Conclusion

After deep and detailed analysis of horoscopes we realized and understood some important perspectives before recommending a Gemstone what parameters we should be considering and they are as follows....

1. Which parameters we should follow while recommending a Gemstone so that the client can derive maximum benefits.
2. Gemstones have their specific advantages and disadvantages and characteristics which are noted before prescribing.
3. While recommending which houses are considered and which are avoided and why to not suggest maraka stone.
4. 1st, 5th and 9th house is best to evaluate before suggesting.
5. Through our research we have clearly understood which are the mandatory points and principles to be taken in consideration before recommending.
6. We have been told why an astrologer needs to avoid 6th, 8th and 12th house and maraka house and if the mahadasha is of the enemy planet its constellation and avoid the stone related to it.
7. We also have been told to strictly check the mahadasha, constellations, Kendra, trines, house, planet degrees, weight of the stone, how to check originality of the stone, exalted and debilitated planets, friendly and unfriendly planets, combust and retrograde, metal to be worn in,

which day to suggest, how to energize the stone by charts, which stone should be avoided while wearing the other.

8. How many stones can one wear.

After all these points and further on which gives maximum benefits and profits in the aspect they are looking for an astrologer should suggest the correct Gemstone which not only helps give the client clarity but also makes his/her life balanced. This has remained our main aim through our research of recommending a Gemstone.

Future work plan

In future, we will see how are stones made and how the final product is received in the market. The process of grinding, cutting and polishing all the key points would be covered.
