Abstract

The Triangle had drawn by Pythagoras, the "Father of Modern Numerology" and "The Mathematician". It had been invented near about 600 BC. Pythagoras method of calculation in Divine Triangle uses the method of counting, which are seen in all methods/ systems of Numerology, i.e. all digits are sum-up into a single digit, simple addition of numbers. Many of millenniums ago, the 'Father of Modern Numerology' created the Inverted Triangle. Pythagoras called it 'Holy Tetraktys'.

As per my study and research the design of triangle comes from 'Vagina' or 'Uterus', the place of birth of every human being, which is called Womb.

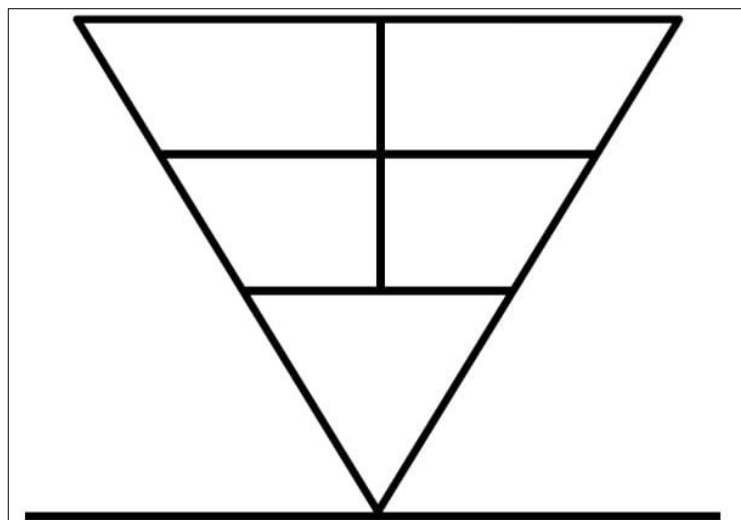

By this triangle method we can easily calculate and read about human life, behavior, character, health, career, even future prediction and much more with the study of various combination and pattern of numbers. The Inverted Trigonum is a magical combination of Chaldean and Pythagorean system in modern numerology. It is very accurate method to check the real outcome of human life's health-wealth and R.B.C. i.e. Red Blood Cells, can be read as Relationship, Business and Career.

Keywords: Inverted trigonum, divine triangle, numbers of wealth, numbers of success, numbers pattern, flow of numbers, numerology
